

Hello,

The 24-hour clock starts **NOW**. Welcome to the TechTrove 2.0 Hackathon!

Your goal is to build a "working app (mobile/web) or a UI/UX prototype" that addresses one or more of the following themes.

Official Hackathon Topics

You have complete freedom to ideate within these four tracks.

1. Artificial Intelligence (AI) Solutions:

- a. Build projects using AI or Machine Learning, such as personalized assistants, recommendation systems, voice recognition, sentiment analysis apps, or AI-powered productivity tools.

2. Sustainability & Environment:

- a. Create technology that tackles carbon footprint reduction, waste management, clean energy support, or other eco-friendly innovations like smart waste sorters or environmental monitoring platforms.

3. Health & Wellness Technologies:

- a. Develop applications focused on physical or mental health, such as fitness/meditation apps, AI-based emotion journals, mental health chatbots, or telehealth solutions.

4. Open Innovation:

- a. If you have a unique idea that falls outside these themes, this is your track. Propose and develop your own unique solution.

Judging & Key Rules

Attached to this email is the **Official Judging Rubric**. Your project will be evaluated on three main pillars:

1. **Concept & Innovation (40%)**
2. **Technical Execution & Progress (30%)**
3. **Feasibility & Future Potential (30%)**

Good luck.
